## 10. EVALUATION FACTORS

10.1 The District intends, but is not obligated, to make a single award to the responsible Quoter whose quote is most advantageous to the District, based upon the evaluation criteria specified in the solicitation. Thus, while the points in the evaluation criteria indicate their relative importance, the total scores will not necessarily be determinative of the award. Rather, the total scores will guide the District in making an intelligent award decision based upon the evaluation criteria. The Technical Rating Scale is as follows:

<u>Numeric Rating</u>	<u>Adjective</u>	<u>Description</u>
0	Unacceptable	Fails to meet minimum requirements; <i>e.g.</i> , no demonstrated capacity, major deficiencies which are not correctable; offeror did not address the factor.

1	Poor	Marginally meets minimum requirements; major deficiencies which may be correctable.
2	Minimally Acceptable	Marginally meets minimum requirements; minor deficiencies which may be correctable.
3	Acceptable	Meets requirements; no deficiencies.
4	Good	Meets requirements and exceeds some requirements; no deficiencies.
5	Excellent	Exceeds most, if not all requirements; no deficiencies.

For example, if a sub factor has a point evaluation of 0 to 6 points, and (using the Technical Rating Scale) the District evaluates as "good" the part of the proposal applicable to the sub factor, the score for the sub factor is 4.8 (4/5 of 6). The sub factor scores will be added together to determine the score for the factor level.

## **C.1 SCOPE:**

The Government of the District of Columbia, Office of Contracting and Procurement, on behalf of the Office of the Chief Technology Officer (OCTO) is seeking a Java Developer to support the Procurement Automated Support System (PASS) upgrade to the Ariba Spend Management (ASM4) platform. The Java Developer will be responsible for designing and developing system enhancements and debug upgraded system code, creating functional and technical design documentation to correspond to assigned enhancement and bug fixes, and assisting the PASS Tier-2 help desk in researching and resolving system issues experienced by the application end users during and after go-live.

### **C.1.1 RESERVED**

### **C.1.1 DEFINITIONS**

**C.1.2.2 OCTO** – Office of the Chief Technology Officer within the Government of the District of Columbia.

**C.1.2.3 OCP** – Office of Contracting and Procurement within the Government of the District of Columbia.

**C.1.2.6 PASS** – Procurement Automated Support System. PASS is the procurement system for all District agencies. PASS is based on the Ariba Spend Management software suite. Currently, two products are implemented within the District government: Ariba Buyer and Ariba Analysis

## **C.2 BACKGROUND**

C.2.1 The Procurement Automated Support System (PASS) is a District-wide Procurement application. The system is based on various modules of the Ariba Spend Management suite and was customized to meet the District's specific procurement needs.

PASS features a fully integrated interface with the Relational Standard Accounting and Reporting System (RSTARS), the District's financial system, using the SeeBeyond eGate integration suite. This gives PASS the ability to automatically create pre-encumbrances, encumbrances, and liquidations to commit funds to pay vendors.

PASS leverages the functionality of the Ariba Supplier Network to send purchase orders electronically to enabled vendors.

C.2.2 PASS was brought online on July 23, 2003 with two District agencies. By November 2003, there were a total of 57 agencies that were using the PASS system.

On April 2, 2004, the Analysis module was implemented within the Office of Contract and Procurement (OCP). The Analysis module is used to create ad hoc reports and perform trend analysis.

On April 26, 2004, PASS was configured for commodity based buying.

As of September 30, 2005, PASS is used by all agencies for all procurement and Direct Voucher spend, except for DC Public Schools (DCPS). The use of the legacy procurement system (ADPICS) has been eliminated. DCPS was brought on line March 27, 2006.

C.2.3 PASS Analysis is used by OCP to create ad-hoc reports based on defined data dimensions in the Buyer module. Commodity managers can use the tool to track spending trends, staff workloads and cycle times. It has helped OCP to analyze data and refine the commodity buying process.

C.2.4 PASS currently has approximately 3,600 users and services 90 agencies. Over 50,000 transactions representing over \$2 billion in District spend are processed by PASS every fiscal year.

C.2.5 OCTO is responsible for the technical operations of PASS, including the development of system enhancements and defect repairs, Tier-2 technical support, and overall system administration and technical infrastructure monitoring and maintenance. The PASS Operations Team is currently seeking a Java developer to augment the current PASS developer corps in completing system development tasks, supporting the Tier-2 help desk in the research of system issues, and write technical documentation describing system changes.

C.2.6 PASS is currently undergoing a major upgrade to the suite of software known as the Ariba Spend Management Suite 4 (ASM4). The Java Developer will be vital to the execution and completion of this upgrade.
